## KOŁOBRZEG

1. Nazwa

### BATARDEAU-OBIĘKT FORTYFIKACYJNY, OB. RUINA W RZECE, FILARY I PRZYCZOŁKI

2. Czas powstania

Prawdopodobnie początek XVIII w.

9. Opis  
Batardeau - unikalny na terenie Polski przykład nowożytnego budownictwa fortyfikacyjnego. Funkcje obronne - prowadzenie ognia wzduż rzeki oraz funkcjonalne: znajdowały się tutaj stawidła, których opuszczenie powodowało spiętrzenie wody w rzece i zalanie terenów wokół twierdzy. Obiekt był posadowiony na dwóch filarach (ich reliaty w rzece), na których oraz na przyczółkach wspierały się trzy łukowe, ceglane przęsta. Na nich - ceglany mur z otworami strzelniczymi nakryty daszkiem z dachówką: nad filarami - dla armat, nad przęstami - po trzy dla broni ręcznej. Budowla rozebrana po uszkodzeniach podczas kruszenia zatorów lodowych. Obiekt był jedynym stałym mostem na Parsęcie oraz galerią ze strzelnicami działowymi i szczelinowymi. Uszkodzenie zabytku w 1986 r., rozebranie nawodnej części zabytku (1987 r.). Zachowany filar ceglany z kamiennymi, półkolistymi izbicami, zwieńczony dwuspadowym okapem oraz dwa przyczółki w formie prostokątnych ścianek, nakrytych płaskim okapem. Mury ceglane, okapy ceramiczne, izbice kamienne.

10. Wrisoski konserwatorskie

Zachowane reliaty - filary zostały odbudowane w formie pierwotnej. Sugestia odbudowy całego Batardeau. Należy dążyć do właściwego utrzymania obiektu, udostępniania i wykorzystania, przy zachowaniu wszystkich elementów historycznych. Ochronie podlega: zabytkowa substancja budowlı i urządzeń fortyfikacyjnych (wałы, fosa, kazamaty), układ przestrzenny i urządzenia inżynierskie umocnień wodno - ziemnych, układ przestrzenny otaczającego terenu objętego strefą ochrony i zieleń towarzysząca. Obowiązuje uzgadnianie z Konserwatorzem Zabytków wszelkich działań inwestycyjnych.
